1. Claims 1, 3-4, 6-7, 9-10, 12, 14, and 16-18 are allowed over the prior art of record.

2. The following is an examiner's statement of reasons for allowance:

The applicant's Remarks, filed on 04/25/2007, have been carefully reviewed with update search. Consequently, reasons for allowance of claims 1, 3-4, 6-7, 9-10, 12, 14, and 16-18 are set forth in the following.

Regarding claims 1, 7, and 14, the prior art made of record fails to clearly teach or fairly suggest the feature of a radio frequency transponder device for use with external device comprises an antenna circuit, a modulation circuit, and a low-power CMOS microprocessor coupled to the antenna circuit and configured to receive operating power from the received radio-frequency signals and to output power from the received signals to the external devices and further configured to monitor inputs on at least one input pin and to generate responsive signals to the modulation circuit for modulating the radio-frequency signals in response to an input signal received on the at least one input pin, the at least one input pin comprising at least one input-and-output pin, and wherein the microprocessor is configured to generate an output on the at least one input-and-output pin in response to the received radio-frequency signals, the microprocessor adapted to process both analog and digital signals, in combination with other limitations, as specified in the independent claims 1, 7, and 14, and further limitations of their respective dependent claims 3-4, 6, 9-10, 12, and 16-18.
